 2.0 DAY COURSE

Ready to take your project management skills to the next level? Our 2-day Practical Project Management course is designed for professionals who want more than just theory, they want tools they can use immediately in the workplace.

Whether you're strengthening your project management foundation or exploring more advanced techniques, this comprehensive course blends proven methodologies with hands-on exercises to ensure you're prepared to lead projects with confidence and control.

Ideal for project managers, team leaders, and professionals responsible for delivering outcomes, this course equips you with the skills to manage projects effectively from initiation to completion.

This dynamic course by PD Training is available now throughout Australia, including Christchurch, Wellington and Auckland.

Please click the Group Booking Quote tab to receive a free quote for courses delivered at your preferred location.

What You'll Gain:

In a world where businesses are increasingly driven by projects, the ability to manage those projects effectively has become a critical skill, regardless of industry or job title. Strong project management not only ensures that objectives are met on time and within budget but also fosters collaboration, mitigates risks, and delivers real value to organisations.

The **Practical Project Management** course was developed to bridge the gap between theory and execution. Over two intensive days, this program combines foundational knowledge with advanced tools and leadership strategies to give participants the confidence and capability to lead projects from start to finish.

This course is designed for professionals who are ready to elevate their skills and drive successful outcomes. With a strong focus on real-world application, participants will walk away with practical techniques they can immediately apply in their roles—whether they're managing internal initiatives, client projects, or cross-functional teams.

We hope this course empowers you to manage projects with greater clarity, control, and impact—and inspires the next step in your professional growth.

Outcomes

By the end of this course, participants will be able to:

- Understand the key roles and responsibilities of a project manager
- Select and initiate projects aligned with organisational strategy
- Define clear project scope and create an effective Work Breakdown Structure (WBS)
- Apply accurate estimating techniques for time, cost, and resources
- Develop realistic project schedules that align with project goals
- Implement change control processes to manage project scope effectively
- Create and manage project budgets using Earned Value Management (EVM) principles
- Identify, assess, and mitigate project risks to ensure smooth delivery
- Communicate effectively with stakeholders and manage expectations
- Build, lead, and develop high-performing project teams
- Apply leadership techniques to motivate and guide project teams
- Conduct effective project closures, capturing lessons learned and documenting outcomes
- Apply project management principles and tools directly to real-world scenarios
