COURSE LENGTH: 1.0 DAYS

Change should be embraced and used for the growth of any organisation. Internal changes must be implemented after the creation of new strategy, or shift in human resource planning. However most organisations are not prepared for internal changes to policies or external strategies. An organisation that plans and prepares for change is better able to overcome these challenges.

The PD Training Change Management Training Course provides training in each step of the planning, preparation and implementation stages of a change to allow organisations to grow steadily in spite of constant changes caused by both internal and external forces.

This practical class in Change Management is available now throughout New Zealand, including Auckland, Christchurch and Wellington.

CHANGE MANAGEMENT TRAINING COURSE OUTLINE

FOREWORD

Change is a constant in many of our lives. All around us, technologies, processes, people, ideas, and methods often change, affecting the way we perform daily tasks and live our lives. This Change Management workshop will give any leader tools to implement changes more smoothly and to have those changes better accepted. This workshop will also give all participants an understanding of how change is implemented and some tools for managing their reactions to change.

Change Management Training is important in today's professional world as organisational change is more the norm rather than the exception. More than ever, work roles and organisations are in a state of flux with changes in structure, re-deployment, return to work, redundancy and personal crisis. Hence it is important to understand the change management process and learn some important change management tools.

Change takes place on three different levels:

- the Individual
- the Team
- the Organisation

Organisational change management has to happen at all three levels as they are interrelated.

This **Change Management** Training Program is geared toward teaching the change management process as well as some change management tools and principles that can support managers, consultants and other change facilitators to fulfill their mission: to initiate and sustain change processes.

OUTCOMES

In this course participants will:

- ▶ Learn about effective change management strategies
- ▶ Understand and recognise individual motivators for change and how to use them
- ▶ Recognise that everybody's personal change journey will be different
- ▶ Develop a change management & communications plan
- ▶ Gain skills required to lead a change project, celebrating a successful change and sharing the benefits and results with all staff
- ▶ Master strategies to align people with change, appealing to emotions & fact
- ▶ Understand the importance of resiliency in the context of change
- ▶ Learn to foster resiliency throughout a change project
- ▶ Understand the importance of flexibility and how to foster this strategy throughout a change project
