[REQUEST QUOTE](#)

0.5 DAY COURSE

Lean Six Sigma (LSS) team members need to have an understanding of certain theoretical and practical knowledge of LSS methodologies for them to be able to carry out a successful project.

The PD Training Lean Six Sigma Team Members Awareness Training Course provides you with a comprehensive understanding and skill development in important LSS practices relevant to employees who participate in improvement processes.

This valuable and engaging course is available throughout New Zealand, including Auckland, Wellington and Christchurch.

What You'll Gain:

As a company implements a Lean Six Sigma Program it is essential all employees understand the objectives and terminology to be used.

This course helps demystify the terminology, and goals of Six Sigma Continuous Improvement projects, thereby reducing fear, and empowering everyone to contribute. Teams will be formed to conduct improvement projects. The "talk of the town" will be Lean Six Sigma. To engage all employees in the ground swell to improving all processes this course provides learning relative to terminology, objectives and the role each employee can play in this effort.

Outcomes

During this Six Sigma Awareness course participants will:

- Develop awareness Lean Six Sigma principals and goals.
- Increase their willingness and ability to contribute to Continual Improvement Projects.
- Develop an understanding of their role as a process team member, and how they can contribute to process re-design.
