1.0 DAY COURSE

Supply Chain Management requires effectively managing the flow of materials, information and finances as they move from supplier to manufacturer to wholesaler to retailer and finally to the consumer. To better compete in a global economy, organisations are finding that a well-managed supply chain is the key to success.

The PD Training Supply Chain Management Training Course offers comprehensive understanding of finances, logistics, tracking, monitoring, inventory management and delivery of products and services to build enhanced supply chains. Your organisation can increase customer satisfaction, increase efficiency and reduce costs by improving the management of your supply chain.

This valuable and practical training course is now available across New Zealand, including Auckland, Wellington and Christchurch.

What You'll Gain:

Rapid global expansion, rising fuel costs, environmental concerns and interconnected businesses can all have a tremendous impact on corporate strategies and costs. Organisations can no longer ignore what happens outside their own four walls, making supply chain management a critical and in demand field.

This course from PD Training helps meet this demand. You'll gain a better understanding of the finances, logistics and delivery of products and services and how it leads to increased efficiencies and competitiveness, while maximising customer value and satisfaction.

Outcomes

By the end of this course, participants will be able to:
